

## ENTRY DOORS

CannonBall:HNP offers a wide variety of versatile, utility and specialty entry doors for use in all markets. Designed with appealing looks and long-lasting durability, each CannonBall door comes with a range of accessories and options to meet all your building needs.

### VERSATILE DOOR

#### 1900-SERIES (1920 & 1934 Models)

**Multi-use, high aesthetics and top quality.**

*For builders in need of professional looks and field adaptability, the 1900-Series doors cover all bets for agriculture, commercial and metal building projects.*

- Galvanized 24-gauge steel -- with 20- and 18-gauge options -- provide strength, stability and rust protection.
- Door jamb weatherstripping is field-replaceable and does not require door panel removal.
- Match your door panels to interior doors with a variety of embossment options.
- 1920 models allow for easy swing direction changes during installation.
- 1934 models have solid headers and ADA-compliant thresholds for use in high traffic, wheelchair accessible entrances.

Recommended Use

|                                     |                    |
|-------------------------------------|--------------------|
| <input checked="" type="checkbox"/> | <b>Agriculture</b> |
| <input checked="" type="checkbox"/> | <b>Commercial</b>  |
| <input checked="" type="checkbox"/> | <b>Metal</b>       |

### UTILITY DOOR

#### 1700-/1800-SERIES (1734, 1795, 1852, 1853, 1872 & 1873 Models)

**Economical rolled or capped edge utility doors.**

*Created for general use on non-code buildings, the 1700- & 1800-Series doors are cost effective fit-and-function solutions for agriculture projects.*

- The 1700-Series provides rolled edge styling, fast installation and a quality look.
- The 1800-Series sports capped edge durability and a variety of skin options to address livestock containment or moisture control needs.
- Both come pre-hung and pre-finished, with optional window lites, door closers and other accessories.

Recommended Use

|                                     |                    |
|-------------------------------------|--------------------|
| <input checked="" type="checkbox"/> | <b>Agriculture</b> |
| <input type="checkbox"/>            | <b>Commercial</b>  |
| <input type="checkbox"/>            | <b>Metal</b>       |

## SPECIALTY DOOR

### 2004-SERIES (2004AL, 2004AF, 2004ST & 2004STB Models)

#### High adaptability for non-code projects.

The 2004-Series provides flexible functionality with thermally broken panel options, universal swing availability and models that fit a variety of wall widths.

- Customizable features allow for proper fit in a wide variety of wall opening sizes.
- Thermally broken STB models prevent frost & condensation buildup on interior door panels and jambs.
- Choose adjustable frame AF models to tackle thick wall projects.

#### Recommended Use

|                                     |                    |
|-------------------------------------|--------------------|
| <input checked="" type="checkbox"/> | <b>Agriculture</b> |
| <input type="checkbox"/>            | <b>Commercial</b>  |
| <input type="checkbox"/>            | <b>Metal</b>       |

### 2005-/2006-SERIES (HD, TB, TBSF & SF Models)

#### Thermal broken models for commercial functionality.

Ideal for industrial and light commercial applications, 2005- & 2006-Series entry doors offer a wide range of features and standard sizing options.

- Thermally broken models prevent temperature transfer, condensation and frost.
- Mounting clips and sub frames are available for easy masonry and steel building installations.
- Solid headers on 2006-Series models increase durability and security.

#### Recommended Use

|                                     |                    |
|-------------------------------------|--------------------|
| <input checked="" type="checkbox"/> | <b>Agriculture</b> |
| <input checked="" type="checkbox"/> | <b>Commercial</b>  |
| <input checked="" type="checkbox"/> | <b>Metal</b>       |

### 2007-SERIES

#### Fire rated to meet building codes.

Certified with a B-label fire rating, the 2007-Series doors also offer flex steel framing to allow for adjustment and a firm fit for years to come.

- B-label fire rating certified.
- Adjustable frames accommodate various wall thicknesses.

#### Recommended Use

|                                     |                    |
|-------------------------------------|--------------------|
| <input checked="" type="checkbox"/> | <b>Agriculture</b> |
| <input checked="" type="checkbox"/> | <b>Commercial</b>  |
| <input type="checkbox"/>            | <b>Metal</b>       |

### 2008-SERIES

#### Highest durability for commercial and metal building use.

Known for robustness and security, the 2008-Series doors are great choices for high traffic entrances on building code projects.

- Ultra-thick panel design with 20- and 18-gauge steel options.
- Frames & sub frames created specifically for metal buildings.
- B or A label fire ratings available.
- Fire-rated window lites and other accessories available as factory-installed options.

#### Recommended Use

|                                     |                    |
|-------------------------------------|--------------------|
| <input type="checkbox"/>            | <b>Agriculture</b> |
| <input checked="" type="checkbox"/> | <b>Commercial</b>  |
| <input checked="" type="checkbox"/> | <b>Metal</b>       |
