

RIDGE CAP SUPPORT BRACKETS

High quality, low cost solutions for your Polycarbonate Ridge Cap installations.

Support brackets come in pre-packaged cartons containing fifteen pieces.

Ridge cap support brackets eliminate the need for field building wooden support blocks.

FEATURES

- Created from 20 gauge steel, CannonBall Ridge Cap Support brackets offer a superior design, longer wear and lower costs than homemade support blocks.
- Bracket designs mirror ridge cap ribbing – offering easy prep and placement before installation.
- Remove costs associated with support block materials, labor and development time on your projects.
- Pre-packaged, fifteen unit boxes ship easy to work sites, take up less space in transport and weigh less than homemade support blocks.
- Save time on your installation – and money on your materials.
