## CAM-LATCH, Part. No. 4, 021, 064

**651303 Cam-Latch** — Can easily be installed in just minutes using ring shank nails or wood screws (not included). Built-in  $\frac{3}{8}$ " cam-action pulls door, even if warped, securely against the jambs. For use on sliding doors, swinging doors and gates. Can be used on metal frame buildings, too! Change from left to right hand by removing center lock nut from welded stud, and turn hook around. Replace handle, backing plate and nut as before. The Cam-Latch is packaged bulk, one right hand and one left hand wired together as a pair. This pair is zinc-plated steel. Weight 2.5 lbs. per pair.
